Back to fundamentals of research: Interdisciplinarity

Roundtable 2: The researchers' perspective

Francisco Xavier de la Cruz Montserrat; Ana Clara Mourão Moura; Evert van Emde Boas; Giorgio Franceschelli; Adriana Latorre; Yasaman Yousefi

09/10/2024

Aula Giorgio Prodi - Piazza San Giovanni in Monte 2 , Bologna

Roundtable 2: The researchers' perspective

ISA Visiting Fellows

- Francisco Xavier de la Cruz Montserrat (*Vall d'Hebron Hospital Institute of Research*)
- Ana Clara Mourão Moura (*Federal University of Minas Gerais, Department of Urban Planning*)
- Evert van Emde Boas (*Aarhus University, School of Culture and Society*)

ISA Doctoral Prize Winners – University of Bologna

- Giorgio Franceschelli (*Department of Computer Science and Engineering*)
- Adriana Latorre (*Department of Cultural Heritage*)
- Yasaman Yousefi (*Department of Legal Studies*)

Pathogenicity prediction using Artificial Intelligence (AI) tools

Francisco Xavier de la Cruz Montserrat

Hospital Universitari Vall d'Hebron - Institució Catalana de Recerca
i Estudis Avançats – Spain

Interdisciplinarity | Roundtable 2: The researchers' perspective

- ❖ **Name and Affiliation:** Francisco Xavier de la Cruz Montserrat; Hospital Universitari Vall d'Hebron - Institució Catalana de Recerca i Estudis Avançats (ICREA)
- ❖ **Pathogenicity prediction using Artificial Intelligence (AI) tools**
- ❖ **Field: Bioinformatics**
- ❖ **Description of the case study: My research is primarily methodological, with a strong focus on healthcare applications**
- ❖ **Take home messages** (benefits and challenges of interdisciplinary research related to the case study)
 - ❖ Ben.- No field has a complete answer to our problem
 - ❖ Ben.- Integration is feasible because of AI
 - ❖ Chall.- Identifying all the components of the answer
 - ❖ Chall.- Data origin, scarcity, and heterogeneity affect the performance of AI models
 - ❖ Chall.- Interpreting the results

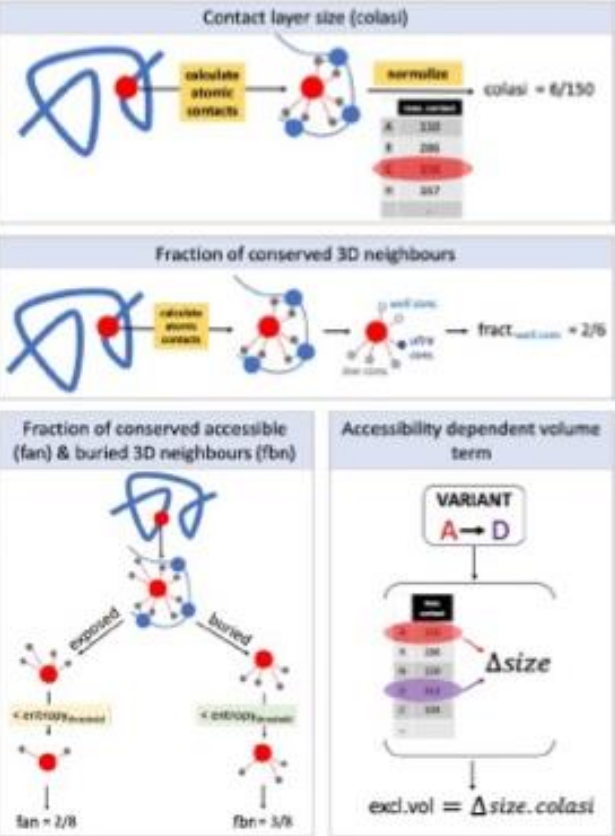

DATA ON HEREDITARY DISEASE

- biomedical res.
- computational sci.
- etc.

WHAT MAKES A VARIANT PATHOGENIC

- biophysics
- biochemistry
- mol. biol.

ARTIFICIAL INTELLIGENCE TOOLS

- computational sci.
- statistics
- maths?

- Neural Networks
- Random Forests
- ...

VALIDATION CLARIFIED

- statistics
- application field

- **Cross-Validation:**
 - N-FOLD
 - LOOCV
 - LGOCV
- Independent Valid.

Geodesign and Geoprocessing: facing the challenges of global climate changes

Ana Clara Mourão Moura

Federal University of Minas Gerais – Brazil

Interdisciplinarity | Roundtable 2: The researchers' perspective

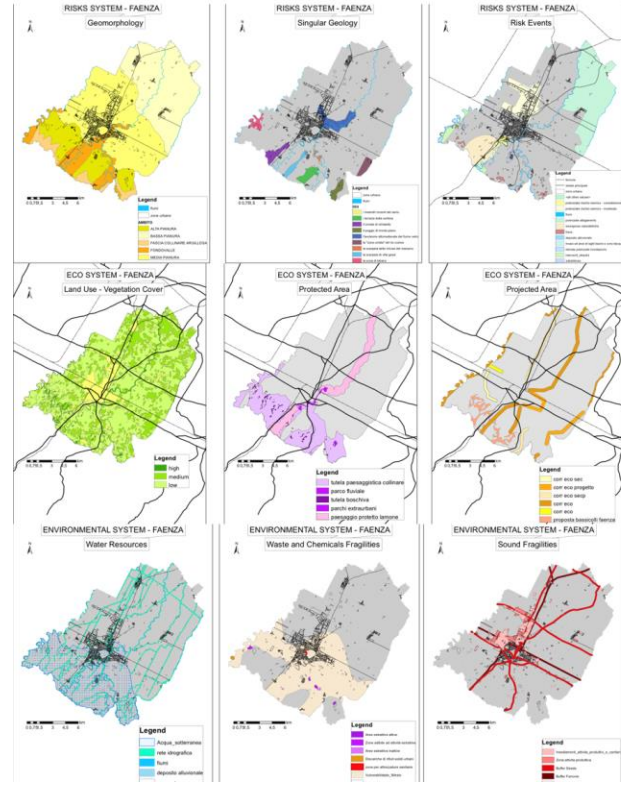

- ❖ **Name and Affiliation:** Ana Clara Mourão Moura; Federal University of Minas Gerais, Brazil (UFMG)
- ❖ **Project title:** Geodesign and Geoprocessing: facing the challenges of global climate changes
- ❖ **Description of the case study:** Geospatial technologies as resources to characterize the territory, presenting characteristics, vulnerabilities and potentialities of the place, to support decision making to deal with the challenges of climate changes. Geodesign as a method of co-creation and to face the values of interoperability, between different actors in society and different values to be considered. The use of geovisualization resources, to make data available to citizens and technicians; the use of interoperability between digital systems, so that we can share data and information; the commitment to use defensible and reproducible criteria, so that people can understand our planning and project; the respect to the sense of scalability, because we must face many case studies; and of adaptability, because each case study has its own local characteristics.

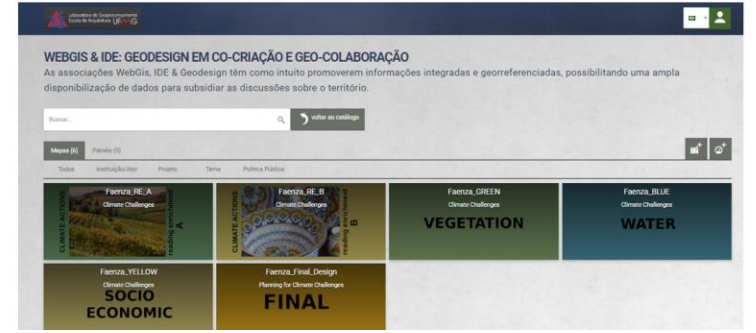

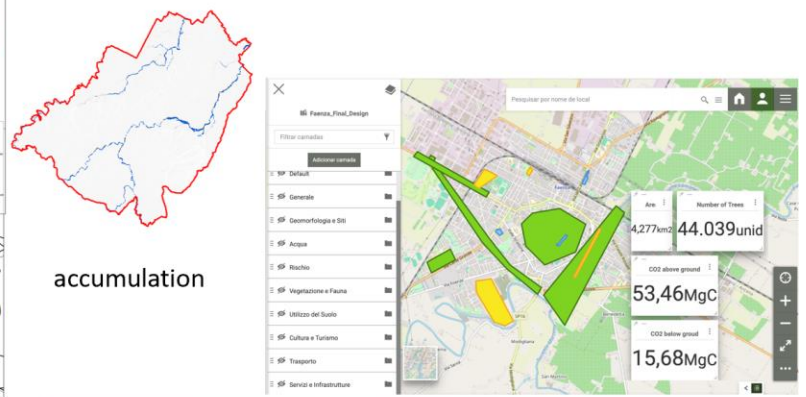

Interdisciplinarity | Roundtable 2: The researchers' perspective

Geospatial technologies

Adults at Play(s)

Evert van Emde Boas

Aarhus University – Denmark

Interdisciplinarity | Roundtable 2: The researchers' perspective

- ❖ **Name and Affiliation:** Evert van Emde Boas; Aarhus University (School of Culture and Society, Department of History and Classical Studies)
- ❖ **Project name:** Adults at Play(s)
- ❖ **Field:** classical studies (specialization in Ancient Greek language and literature), but interest in cognitive approaches to (ancient) literature, and in interdisciplinary work traversing literary studies/drama studies and (cognitive, social) psychology
- ❖ **Description of case study:** research collaboration between classicists, English literature scholars, and psychologists, investigating the psychology of drama audiences.
- ❖ **Example 1: Endorphins (?)**

Generative Artificial Intelligence and Creativity

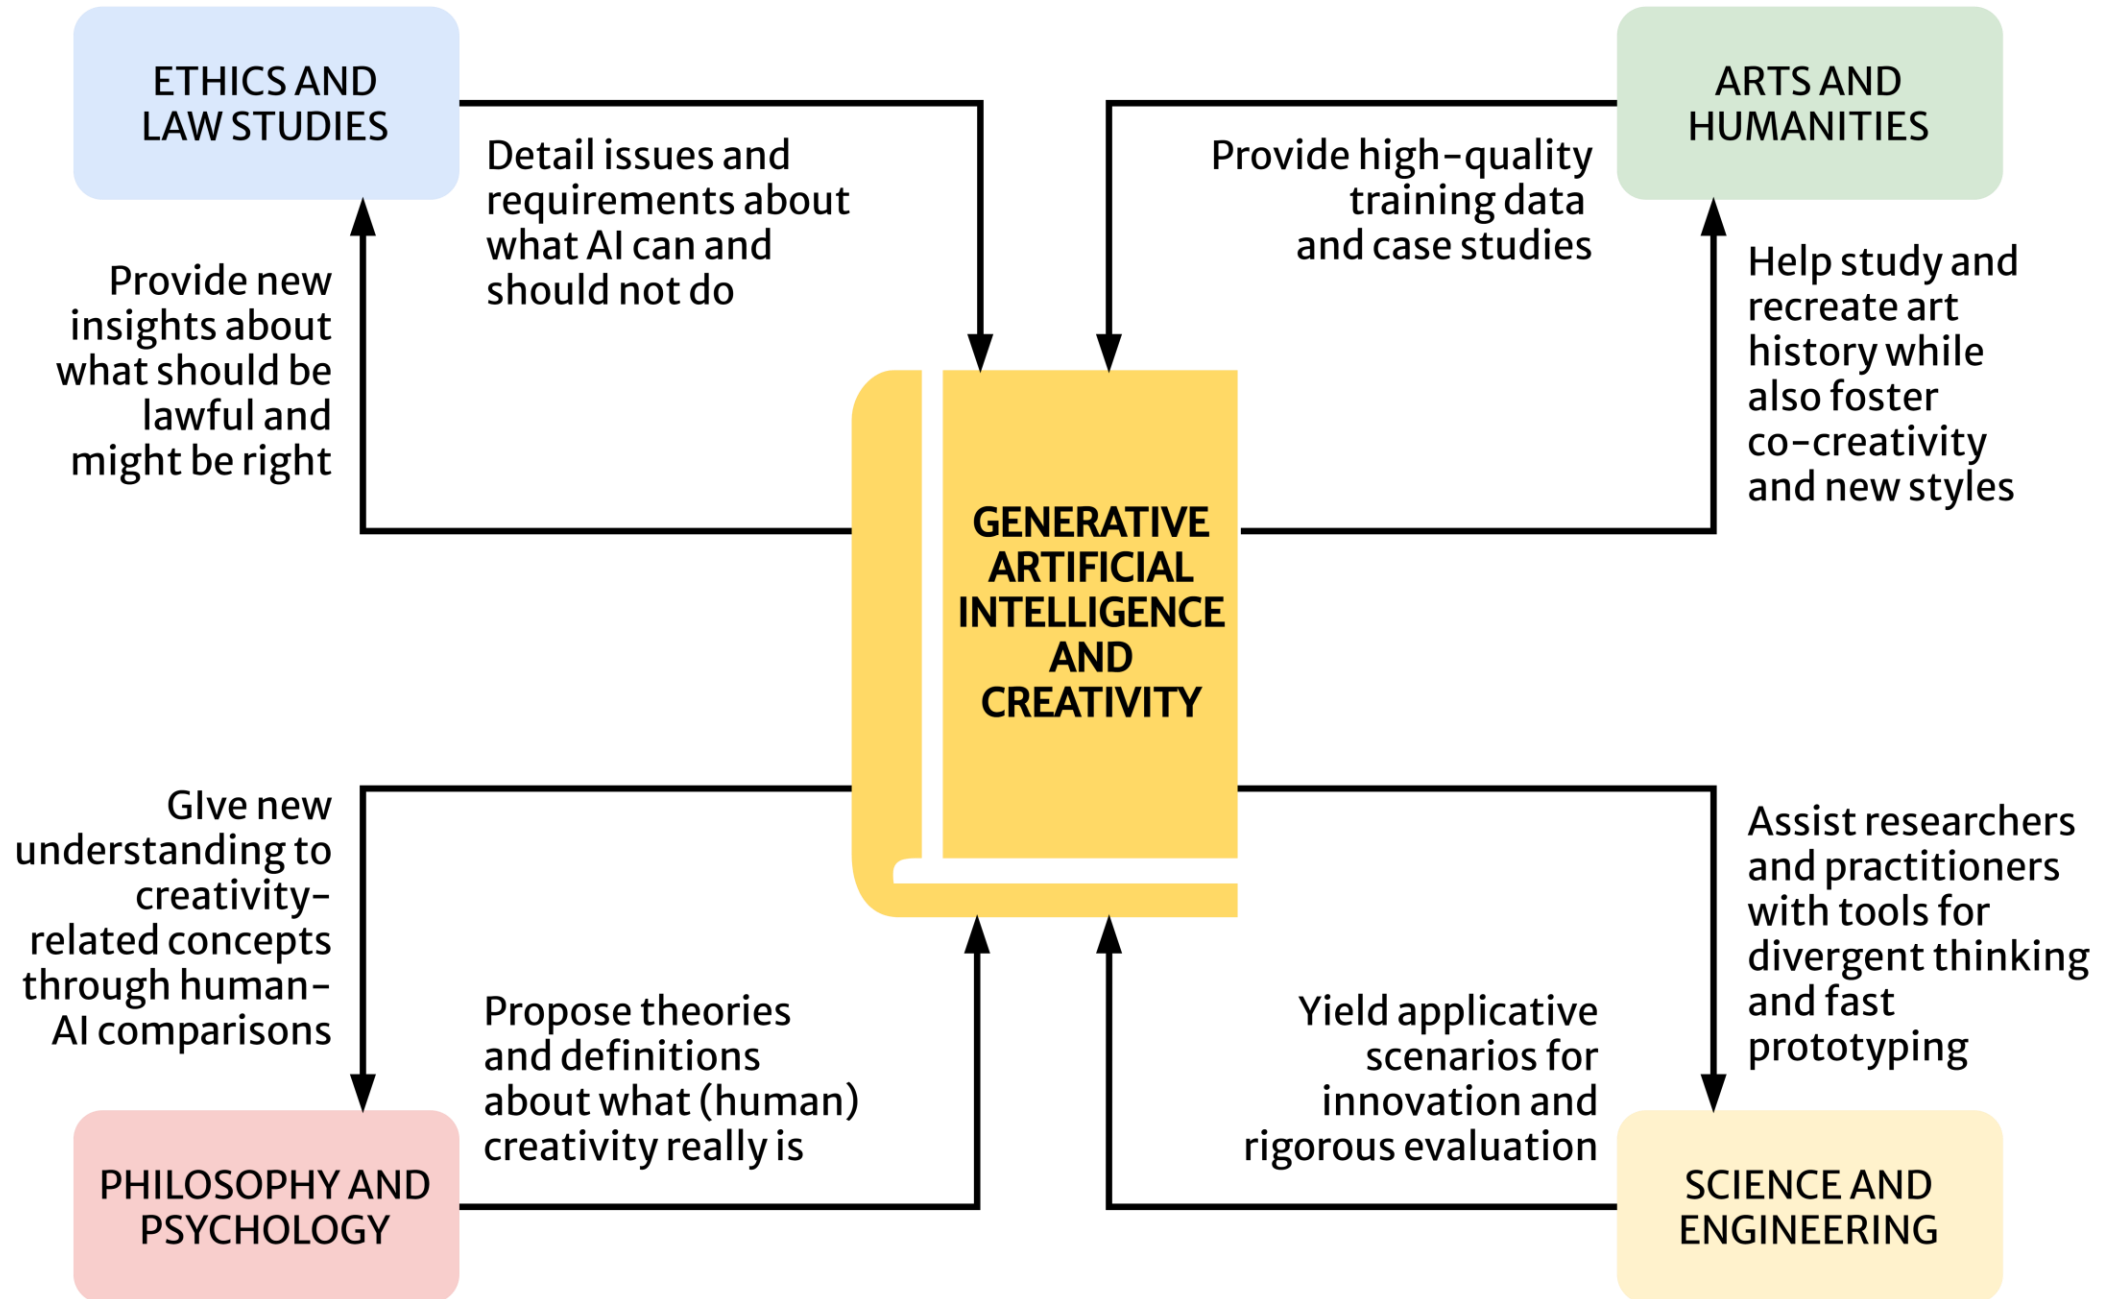

Giorgio Franceschelli

Department of Computer Science and Engineering

Interdisciplinarity | Roundtable 2: The researchers' perspective

- ❖ **Name and Affiliation:** Giorgio Franceschelli – Department of Computer Science and Engineering, University of Bologna
- ❖ **Project name:** Generative Artificial Intelligence and Creativity
- ❖ **Description of the case study:** Application of reinforcement learning techniques to develop generative AI models that are closer to human theories of creativity and less dependent on training data, addressing ethical and legal issues, and providing tools to foster divergent thinking.

A multidisciplinary approach to the study of the lagoon population of Venice

Adriana Latorre

Department of Cultural Heritage

Interdisciplinarity | Roundtable 2: The researchers' perspective

A multidisciplinary approach to the study of the lagoon population of Venice

Challenges and Benefits of Interdisciplinary Research

BENEFITS:

- ❖ Exploring other disciplines allows for broader avenues of dialogue regarding the research project
- ❖ The combination of data from different disciplines can lead to new discoveries that would not have emerged by considering only data from more narrow research fields
- ❖ A better and more reliable understanding is provided by comparing different scientific data
- ❖ It fosters teamwork among experts with different skills, promoting the exchange of ideas and diverse approaches

CHALLENGES:

- ❖ Different and hard-to-understand research terms
- ❖ Different ways of interpreting data
- ❖ Different research studies provide results that don't match
- ❖ The combination and integration of data from different disciplines can be complicated

The Quest to Fairness in AI

Yasaman Yousefi

Department of Legal Studies

Interdisciplinarity | Roundtable 2: The researchers' perspective

- ❖ Yasaman Yousefi, PhD
Candidate in Law, Science and
Technology at Unibo,
- ❖ PhD candidate in Computer
Science at Unilu
- ❖ Thesis: The Quest to Fairness in
AI: Ethical, Legal and Technical
Solutions

Challenges and Benefits of Interdisciplinary Research

Benefits

- **Holistic Understanding of the Problem**
- **Innovative Solutions**
- **Practical Impact**
- **Cross-disciplinary Learning**
- **Future-oriented**
- **Better job opportunities and a Unique Profile**

Challenges

- **Integration of Diverse Disciplines**
- **Conflicts in Terminologies and Notions**
- **Technical Complexity**
- **Publication Difficulties- Getting validation and setting common grounds**
- **Background Insufficiency**
- **Dynamic Legal and Technological Landscape**
