Data set Documentation

The tabular files gather all the outputs of the seven City training workshop (Berlin, Bologna, Barcelona, Lisbon, London, Paris, Tallin) carried out online between October and November 2020. City training workshops reflected upon platform work and skills in an urban setting, addressing workers, representatives, coordinators in the seven case study cities, including a selection of stakeholders and potentially interested actors.

The data set is in tabular format. The synthesis (n.10 above) contains all the results summarized and is divided in three columns: in the first are listed the variables collected; the second column lists, per each variable, the common features observed; the third column reports the urban-specific characteristics per each variable.
