Data set Documentation

The PLUS project developed a Massive Open Online Course engaging many partners involved in different Work Packages.

The PLUS MOOC is an online course where all the main scientific results of the PLUS project are synthetically elaborated for a wide and heterogeneous public.

The materials (texts) used for the recording of every single lesson are divided in specific files. All materials are collected in ODT format.

The course is organized around four weeks of lessons and a general introduction.

The videos of the Massive Open Online Course are available here:
